

Abimbola Olawale Victor

Portfolio: [olawale0254.github.io](https://github.com/olawale0254)

Github: github.com/olawale0254

Email: abimbolaolawale41@gmail.com

Mobile: +234-816-8928-910

EDUCATION

- Worldquant University** New Orleans, United States
Masters Degree - Financial Engineering February 2022
Courses: Statistics, Machine Learning in Finance, Time Series, Econometrics, Risk Management, Computational Finance, Algorithmic Trading
- The Federal Polytechnic Ilaro** Ogun State, Nigeria
Higher National Diploma - Statistics Oct 2018
Courses: Statistics, Machine Learning, Time Series, Econometrics, Data Analysis/Analytics

SKILLS SUMMARY

- Languages:** Python, SQL, R
- Frameworks:** Scikit, NLTK, SpaCy, TensorFlow, OpenCV, Keras, Streamlit, Flask
- Tools:** GIT, PostgreSQL, SQLite
- Platforms:** Linux, Web, Windows, Arduino, AWS, GCP
- Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

EXPERIENCE

- Data Science Nigeria** Lagos, Nigeria
Data Scientist (Full-time) Jan 2020 - Date
 - Crowd-sourcing:** Provided a GIS technical services and support particularly related to city/county applications using Java Open Street Map (JOSM), QGIS and ESRI Product and also extract relevant information from the overall geospatial data gathered from various sources, analyzed and visualized to solve problems related to intelligence.
 - Crowd-sourcing:** Built an end-to-end computer vision model that could classify Community pharmacy's (CP) and Proprietary Patents and medicine Vendors (PPMV) stores in local areas in Nigeria
 - Research and Innovation:** Built a Retail audit Computer Vision model using YOLO architecture to recognise over 500 FMCGs products in Nigeria, determine the visibility and providing detailed analytics based on the detected FMCGs products
- Africa4AI** Remote
Research Assistant (Part-time) Dec 2019 - Jan 2021
 - Project:** A computer vision model that can be able to detect **rooftop** from **satellite images** most especially in remote areas in Africa
 - Research:** A thematic analysis of twitter conversation peoples believe on COVID-19
 - Research:** Worked on an extensive study on the prediction of accidents on some major roads in South Africa

Big T Infotech technologies

Robotics Instructor (NYSC)

Asaba, Nigeria
Oct 2018 - Nov 2019

- Maintaining and preparing robotic tools for use, and training of kids on robotics and computer programming and graphics design

National Bureau of Statistics

Student Intern

Abeokuta, Nigeria
Nov 2014 - Jan 2015

- Delivering valuable insight from Data and helping with Weekly and Monthly Reports
- Verification of Data Integrity and Computational Analysis.
- Analysis of Data with Statistical Softwares, SPSS, EViews and R Programming language.

PROJECTS

- Advance Convolution Neural networks (CNN) approach in Classifying COVID19 CT Scan Images:** Comparing the Performance of AlexNet and ResNet in classifying COVID-19 CT Scan images and Normal Images
- Counting buildings and identifying points of interest:** The identification of buildings in Africa looks so daunting due to the irregularity in the arrangement of buildings in various settlements. This project focuses on developing a framework which will help in counting buildings and subsequently identify points of interest by applying object detection
- Classification of Computer Virus in Windows Environment Using Advance CNN approach:** The data consist of about 26 classes of different types of virus images. The purpose of this project was to present a better model which could outperform models presented by other researchers. To achieve this, we applied Xception transfer learning model for the feature extraction and our model was trained using LightGBM
